AutoCompletion for Workspaces

### AutoCompletion for Workspaces Names

If enabled, AutoComplete now suggests file and directory names as you type the system commands `)COPY`, `)LOAD`, `)XLOAD`, `)LIB` and `)DROP`.

For example, the following picture illustrates the suggestion box after typing:

`)LOAD C:`

In the next picture, the user has pressed "w", so the choice is reduced to the `ws\` subdirectory and `WTUTOR95.DWS`
