### Selected Cells – Appearance

The Grid now displays selected cells in a manner that is more consistent with current versions of Microsoft Excel.

	A	B	C	
1	1316	7557	4587	5328
2	6868	5890	9305	8462
3	9826	7227	7534	6516
4	5046	5163	3191	9867
5	1254	159	6885	8683
6	4680	2873	1784	1538
7	2746	30	4143	269
8	9555	5562	1482	9834
9	4765	3894	2033	284

The selection is now displayed using a transparent version of the Selected Items colour and is surrounded by a thick border. The selection is displayed behind the Input object and is reflected in the row and column titles.

When the Grid loses the focus, the default is for the selection to be dimmed as shown below.

	A	B	C	
1	1316	7557	4587	5328
2	6868	5890	9305	8462
3	9826	7227	7534	6516
4	5046	5163	3191	9867
5	1254	159	6885	8683
6	4680	2873	1784	1538
7	2746	30	4143	269
8	9555	5562	1482	9834
9	4765	3894	2033	284

Alternatively, you may now hide the selection entirely when the Grid loses focus by setting the new `AlwaysShowSelection` property to 0.

	A	B	C	
1	1316	7557	4587	5328
2	6868	5890	9305	8462
3	9826	7227	7534	6516
4	5046	5163	3191	9867
5	1254	159	6885	8683
6	4680	2873	1784	1538
7	2746	30	4143	269
8	9555	5562	1482	9834
9	4765	3894	2033	284

Note that there is also a new property `AlwaysShowBorder` to control the appearance of the border around the current cell when the Grid loses the focus.
