- ▶ Grid Improvements
- ▶ Row TreeImages

Row TreeImages Property

The RowTreeImages property is a simple character vector or a vector of character vectors that specifies the name(s) of Bitmap objects that are used to display the tree nodes for a Grid object.

Note that images in tree nodes are only displayed if RowTreeStyle is set to `'ImagesOnly'`, `'ImagesAndLines'`, or `'AllImagesAndLines'`.

If RowTreeImages is not specified default images are used.

- The Bitmap specified by the 1st element of RowTreeImages is used to display *unopened* nodes.
- The Bitmap specified by the 2nd element of RowTreeImages is used to display *opened* nodes.
- The Bitmap specified by the 3rd element of RowTreeImages is used to display nodes *without children*.

For example:

```
'Closed'[]WC'Bitmap' 'Folder.bmp'
'Open'[]WC'Bitmap' 'FolderOpen.bmp'
'Item'[]WC'Bitmap' 'Ideas'
F.G.RowTreeStyle←'AllImagesAndLines'
F.G.RowTreeImages←'Closed' 'Open' 'Item'
```
