

**▶ Interfaces****▶ ODBC****ODBC**

The ODBC interface is provided by SQAPL for ODBC which is included in Dyalog and distributed under licence from Insight Systems ApS.

SQAPL for ODBC allows you to access any ODBC compatible database driver from Dyalog and, depending upon the driver's capabilities, perform a wide range of database operations including query, update, commit and rollback.

The interface is supplied as a DLL and a small companion workspace.
