The APL Trust US

Non-Profit Charity - IRS 501(c)(3)

Mission:

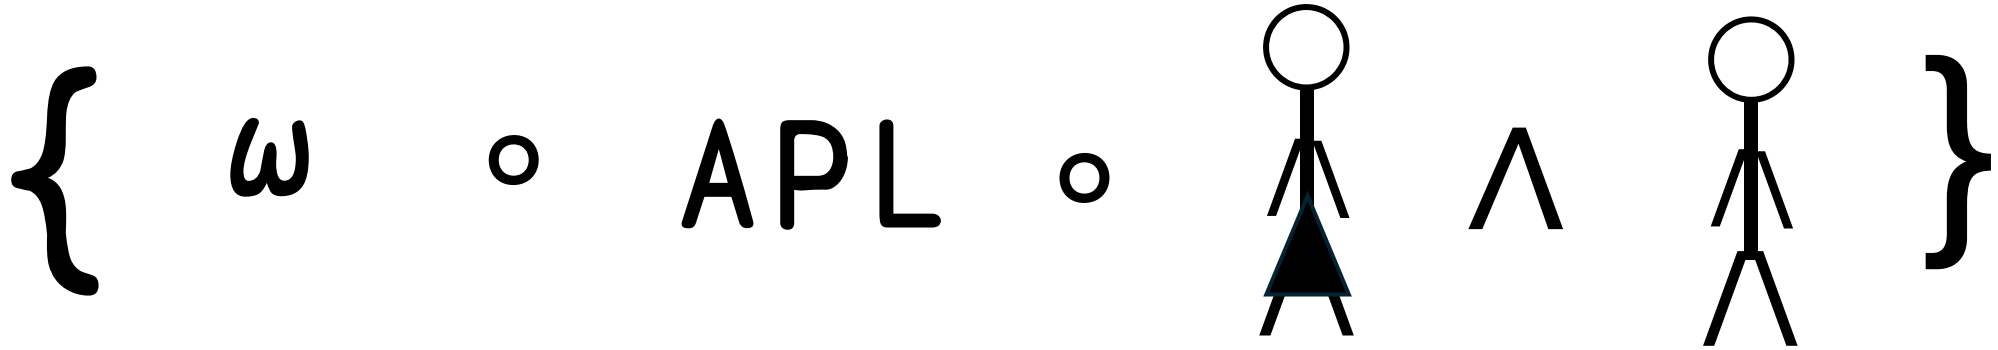

We are a non-profit dedicated to promoting the global awareness and use of the APL programming language.

By funding an array of APL based projects, particularly in the fields of science, engineering, and mathematics we aim to showcase the genuine utility of APL as a tool of thought to improve the capabilities of people and computers alike using concise code.

Current Status?

- The APL Trust US is an Incorporated Charitable Entity
- We received IRS approval of Tax-Exempt Status
 - On September 24, 2025. Donations Tax Deductible!
- We have Donation Pledges and Funds Received
- We are launching a Letter of Intent Grant Application Process

Announcement: APL Education, Innovation and Impact Grants

The APL Trust US is excited to announce the upcoming launch of the *APL Education, Innovation and Impact Grants*. We plan to award **grants of up to \$25,000 each** to projects that advance the use and understanding of the APL programming language.

We encourage proposals from experienced APL practitioners as well as from applicants with strong domain expertise who demonstrate a clear plan to learn and apply APL within their project. In this inaugural cycle, priority will be given to projects that show both feasibility and strong alignment with our mission. While APL is especially powerful for mathematically intensive problems, potential applications extend across many domains — including **artificial intelligence, bioinformatics, medicine, finance, supply chain, aviation, engineering, and education**.

We invite interested applicants to submit a **Letter of Intent (LOI)** through our online form. The LOI should be a brief (1–2 page) summary outlining the project idea, its relevance to APL, anticipated impact, budget estimate, and key personnel.

Submit your LOI here: [Google Form link – coming soon]

Deadline for first round of applications: December 31, 2025

Applicants will be notified within 45 days of LOI submission to indicate if they are invited to submit a full proposal.

LOI Instructions – APL Education, Innovation and Impact Grants

Letter of Intent (LOI) – Pre-Announcement Phase

The APL Trust US

The APL Trust US invites prospective applicants to submit a Letter of Intent (LOI) for consideration in the inaugural cycle of the APL Education, Innovation and Impact Grants. This pre-announcement process allows us to identify strong projects aligned with our mission while our IRS 501(c)(3) application is under review.

We encourage proposals from experienced APL practitioners as well as from applicants with strong domain expertise who demonstrate a clear plan to learn and apply APL within their project. In this inaugural cycle, priority will be given to projects that show both feasibility and strong alignment with our mission. While APL is especially powerful for mathematically intensive problems, potential applications extend across many domains — including artificial intelligence, medicine, finance, supply chain, aviation, engineering, and education.

The APL Trust committee will provide guidance and feedback throughout the project process. We will have intermediate reviews to collaborate on progress.

Each LOI should be **1 page (maximum 2)** and must include the following information:

1. Project Title

Concise and descriptive.

2. Applicant Information

- Name of organization or individual
- Contact person, email, and phone
- Website (if applicable)

3. Project Summary (max 200 words)

Briefly describe the project idea, goals, and its connection to APL.

4. Alignment with Mission (3–4 sentences)

Explain how your project promotes awareness or use of the APL programming language. *Applicants may address mathematically intensive challenges in any domain, including AI, medicine, finance, supply chain, aviation, engineering, and education. Applicants with no prior APL experience should outline a clear plan for learning and applying APL within their project.*

5. Anticipated Impact

State the expected outcomes and who will benefit.

6. Metrics to Determine Success

Describe how we determine if the project achieves its anticipated impact.

7. Estimated Budget & Duration

Approximate funding requested (up to \$25,000) and expected timeline (in months).

8. Key Personnel

Identify the lead applicant(s) and all team members. For each person, provide:

- Name
- Role in the project
- Relevant expertise (1–2 sentences)

Contact information (email and phone)

Submission Instructions

LOIs should be submitted via [Google Form link – to be provided].

Applicants will be notified within 45 days of LOI submission to indicate if they are invited to submit a full application.

Mission Statement

The APL Trust US is a non-profit dedicated to promoting the global awareness and use of the APL programming language. By funding an array of APL-based projects, particularly in the fields of science, engineering, and mathematics, we aim to showcase the genuine utility of APL as a tool of thought — improving the capabilities of people and computers alike through concise and expressive code.
