Announcing:
Dyalog Ltd's seventh annual APL Problem Solving Competition

Students worldwide are invited

Put your programming and problem solving skills to the test by using any APL system
to develop solutions to ten open-ended questions and solve a series of problems for your chance
to win cash prizes.

APL is a very high level programming language available in both free and commercial versions.

Why participate?

This is a contest for people who love a challenge and learning new things for fun. At stake are
43 cash prizes totaling $8,500, including a grand prize of $2,500 and a trip to Sicily, Italy to
attend the next Dyalog User Meeting in September 2015.

Learn more about this competition, as well as rules and eligibility here.
