# Announcing:
Dyalog Ltd's 14th annual APL Problem Solving Competition

Students worldwide can participate.

Put your programming and problem solving skills to the test by using any APL system to develop solutions to ten open-ended questions and solve a series of problems for your chance to win cash prizes.

APL is a high level programming language available in both free and commercial versions.

Why participate?

This is a contest for people who love a challenge and learning new things for fun. At stake are 18 cash prizes totalling $6,500, including a grand prize of $2,500 and a trip to the next Dyalog user meeting.
